Media d’enregistrement PXW-Z280

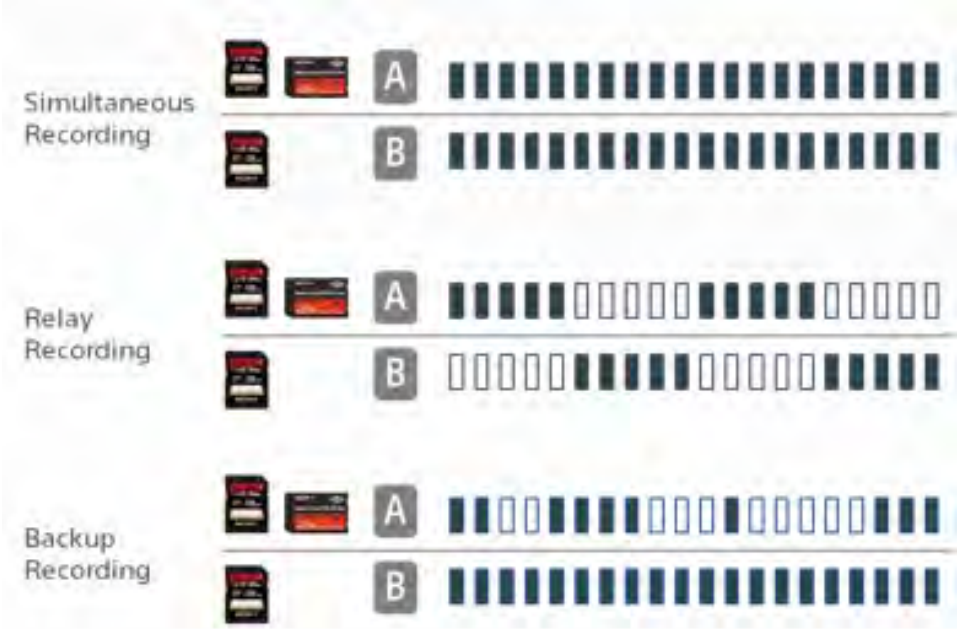
Support principal: carte SxS - fiabilité élevée

Compatible avec les cartes de la série XQD G & H en utilisant l'adaptateur optionnel QDAEX1

Compatible avec l'enregistrement sur carte SD en utilisant l'adaptateur optionnel MEAD-SD02 (HD uniquement)

Logiciel MMU – Memory Media Utility:

- Sauvegarde simultanée du contenu vers trois destinations
- Formatage des médias
- Bibliothèque de cartes mémoire SxS



Enregistrement longue durée, sauvegarde de données sécurisée, flexibilité d'enregistrement, choix plus large de supports d'enregistrement.
