- For camera up to 3 kg.
- The camera apartment is easy to remove from the TurtleX.

Made for Professionals by a Professional

# Turtle X<sup>pat.</sup>

-for light DV-cameras

Introducing Turtle X, the new member of the Easyrig family!

Turtle X has been created specifically with HDV camcorder users in mind and offers the same innovative features as its larger brother – The Easyrig.

Suitable for cameras including the Sony HVR-Z1, Panasonic HVX200 and the Canon XLH1

The Turtle X protects and transports your camera when used as a backpack.

Simply open out the flexible support arm and you quickly and easily have a lightweight portable camera support system

*"Creativity demands that I often work hand-held, I am always moving around and looking for that perfect shot. Before the Turtle X my hand-held shots always ended with shaky hands and shaky pictures. Now with Turtle X on the scene I have no excuses."*

*"It takes me less than a minute to get my Turtle X ready for use, once I've put it on I get shake free, steady shots for hours and can continue to stand and move around. In my opinion it's the best invention since the tripod!"*

**Lennart Peters**  
Camera man

## Technical details

Weight:	Complete 3,9 kg (8.59 lb) Camera apartment 1,1 kg (2.42 lb) Supportarm with straps 2,8 kg (6.17 lb)
